RE: Tom Clarke Construction / Beveland Street Building

Dear Future Client,

We had been searching for many months before the building on Beveland Street came on the market. We had admired the building many times as we drove by it in our search for a new home for our small Foundation, but never thought it would come up for sale. When our realtor called us to say the owner was looking to sell we were thrilled. A short time later we were the proud owners of a Tom Clarke original.

Even from the street it's clear that Thomas Clarke Construction is a designer and builder of quality buildings. We were so taken with the look and feel of the building, inside and out, that we asked Tom to take charge of a fairly extensive remodeling of the second floor where we now have our offices. Tom has a great eye for design, and more than once provided creative ideas that we liked as well as anything our architects might have drawn up. Tom was great to work with too, and his crew was always pleasant and respectful.

We love our new home on Beveland Street and can recommend Thomas Clarke Construction without reservation. If you ever want a tour please feel free to call our office!

Sincerely,

Dan Davis

President
